

Mobility Scooter Carrier

This great scooter carrier will hold even the heaviest scooter or electric chair, that's how tough it is.

Go to the park on a family outing or to the shops and park easily in the underground car parks. Wherever you want to go, this carrier will take you there.

The loading ramp drops down so you can safely load your scooter or chair, then use the anchor points to secure it down. When you get to where you're going, just reverse off. This carrier folds up behind your care when not in use and can be detached from your care if required.

Questions and Answers

Q: Does the scooter carrier fit onto all cars?

A: No, your car needs to have a Hayman Reese 50mm Hitch fitted, and a 'down weight' capacity of 150kg. This is based on a scooter that weighs around 110kg and the scooter carrier that weighs 43kg.

Q: How come you don't need to register it?

A: Queensland Transport say that no registration is required because it does not have any wheels that come into contact with the road.

Q: Do you provide a warranty?

A: Yes, we provide a 3-year manufacturers warranty guarantee on the carrier framework.
